

MANAGED IT SERVICES

Your organization's information technology infrastructure is a critical piece of your business. The rapid speed of changes in the market and business environment within the insurance and employee benefits market can quickly result in antiquated systems, dated security framework, and inefficient operations.

Onyx Data Solutions' Managed IT Services provide a comprehensive IT strategy and management model that is unique to your business. Focusing on people, process and technology, the Onyx team will work with your organization, review your operations and develop an efficient, flexible, secure, and stable plan to modernizing your IT approach and handling your operations.

ONYX'S MANAGED IT SERVICES CONSIST OF MANAGEMENT OF ALL IT OPERATIONS, INCLUDING:

- Strategic planning
- Optimization of infrastructure and data management
- Issue management, monitoring, prevention and resolution
- Vendor selection, procurement, implementation and management
- Comprehensive testing and quality assurance checks on releases
- Implementation of the highest information security standards across the organization
